

DAPA Spline

manufactured for every climate

Testing by independent laboratories proves that Lincoln Sentry DAPA Spline has a UV resistance far superior to other spline products. This means that customers can rely on excellent long term performance over all temperature variations, as it doesn't harden in colder months / climates or excessively soften in warmer months / climates, which keeps mesh tight in any climate.

The flexibility and durability of the Lincoln Sentry DAPA Spline allows for easy insertion and cornering. As a result, the user friendliness of Lincoln Sentry DAPA Spline reduces assembly time, injury and helps prevent operator fatigue.

An innovative new security system

Lincoln Sentry is changing the landscape of the Australian Security Market with the introduction of Sabretooth, an innovative new security system.

Exclusive to Lincoln Sentry, the Sabretooth System sets the benchmark in balancing a great modern look, with an affordable price. Consumers looking to increase the value of their homes by replacing their tired old diamond grille screens, or simply wishing to put a modern spin on their doors and windows, can now do so without hurting their hip pocket by choosing Sabretooth as their security system preference.

* For Dealership opportunities in your area, or for more information, simply call your nearest Lincoln Sentry branch on 1300 551 919

before

after

The Sabretooth System's innovative, patented product utilises an all aluminium construction with a hardened aluminium alloy perforated sheet infill retained into the aluminium frame using 3M adhesive technology. The product has undergone extensive testing and meets all of the performance requirements of Australian Standard AS5039 for security doors and windows. Being all aluminium, the product will look great for many years with a minimum of fuss in terms of maintenance.

The Sabretooth perforated infill allows for clarity of vision, excellent shading and UV reduction characteristics, and allows natural breezes to pass whilst still keeping out those irritating insects.

The product range includes hinged and sliding doors, together with window screens, patio enclosures and privacy screens; all in an extensive range of frame colours. Available only through Lincoln Sentry licensed Sabretooth Dealers; this revolutionary product increases the choices available to consumers and demonstrates true value.
