# Blum TANDEMBOX Drawer Systems

Blum's tried and tested TANDEMBOX systems offer superior quality of motion and enable you to fulfill a wide range of customer requirements. The proven TANDEMBOX line offers two different design styles to choose from with TANDEMBOX intivo which exceeds all design and functional expectations or TANDEMBOX antaro for a sophisticated design and minimalist style.

True to Blum's philosophy of perfecting motion, supporting functionality and creative design, we continue to provide our customers with differentiated product solutions and more options.

TANDEMBOX intivo continues to service customer tastes that are becoming more sophisticated when it comes to furniture fittings in their kitchen and their home. TANDEMBOX intivo provides a solution for customers looking to be able to create

individuality and the next level of interior design making kitchen, entertainment areas, studies, wardrobes or bathroom cabinet interiors unique. Flawless finishes of silk white, terra black and stainless steel together with design elements from any desired material such as glass, timber or leather will fulfill a personalised touch. There is a design to suit any kitchen.

TANDEMBOX antaro enhances the industry standard of TANDEMBOX drawer solutions and complements the changing façade of furniture design. TANDEMBOX antaro is the creation of a more sophisticated design and modular drawer system that provides more design solutions to an increasingly competitive market. The drawers' silk white finish and clear cut rectangular design highlights that less is more. The pull-out side can be closed

using a metal or frosted glass design element providing a sophisticated edge for kitchens.

One of the main principles to optimise space in the kitchen is to equip base cabinets with pull-outs instead of doors. They are far more ergonomic, removing the need to bend down to dig things out from the back of the cabinet.

Using pull-outs instead of doors ensures all contents can be seen at a glance and are easily accessible. In addition, optimal access is made possible if interiors are well organised with ORGA-LINE.

Blum's TANDEMBOX drawer systems can be fully extended to give users clear visibility of all contents, and it is also possible to use any design with Blum's space saving cabinet solutions; SPACE CORNER, SPACE TOWER (pantry) and Sink Drawer.

# Quality for the Lifetime of the furniture

Blum's goods come with guarantees that cannot be excluded under the Australian Consumer Law.

You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Blum will provide replacement products to the original purchaser when any instructions issued by Blum have been complied with, including without limitation, that the product has not been subject to improper use, improper operation or excessive load.

Blum will be responsible for any expenses associated with sending the replacement parts to your address [within Australia].

Removal of the defective product and/or installation of the replacement part is not covered under warranty.

Non-electrical components are covered by a lifetime warranty.

The warranty period for electrical components when used with Blum products is 5 years.
