

## Functional built-in waste management

The 560 Waste Program is a built-in waste management program that combines both functionality and design to suit residential and commercial kitchen spaces. Made from a combination of metal and plastic for added strength and durability, the range features a stylish matt grey finish, individual bucket lids and the option of a metal cabinet lid to help mask and minimise odours.

The 560 Waste Program comes in a variety of different sizes and bucket heights to suit a range of cabinet widths and has been designed to suit Blum's TANDEMBOX intivo and TANDEMBOX antaro range. To completely automate the waste system, install Blum's SERVO DRIVE for hands free opening and closing.

# 560 Waste Management System

- European made
- Maximise space within your carcass with a bin at the top or bottom

**Optional:**

- Designed to suit Blum TANDEMBOX antaro and TANDEMBOX intivo
- Improve performance with SERVO-DRIVE by Blum
- Metal carcass lid to combine with individual bin lids to minimise odours
- 300mm to 900mm carcass width options available
- 3 bucket heights

Features	Benefits
Buckets at top of drawer profile	Aesthetically pleasing, nowhere for waste to gather
Different capacity size bins	Options and combinations
Individual bin lids	Minimises odours
Combined metal & plastic frame	Strength and stability
Grey matt finish	Design and aesthetically appealing
2 x Additional front fixing brackets	Additional front panel stability to ensure alignment
500 & 450 Nominal length options	Increased design options, especially in sink applications due to waste pipes
